CONSCIOUS HEDONISM, SUSTAINABLE LUXURY

On the domestic and international travel scene, there are several 5-star, "adult-only" hotels offering eco-conscious services on a luxury level. The expectations and travelling habits of guests have also changed. They are seeking such options and locations to relax and unwind, where hedonism and sustainability are hand in hand with each other, and where they can enjoy the tranquility of an adult retreat on a luxury level without having to feel guilty about it.

Mankind's constant dilemma is the balance between welfare and well-being. The conscious lifestyle and LUA Resort***** Balatonfüred provides the answer. The concept is at the intersection of consciousness, luxury, conscious hedonism and sustainable luxury.

LUXURIOUS & UNCONVENTIONAL & ADULT

The resort is in front of Balatonfüred's brand new marina, where welfare is accompanied by well-being; and where we can experience a healthy and eco-conscious lifestyle and the option of an adult retreat, as well as exclusive and personalized services on a luxury level.

ROOMS AND COMMUNAL SPACES

There is such a place, where luxury is not all about sparkle, but quality me-time, and the option of a retreat. A place, where we can allow ourselves to let go and have the option of total renewal on natural grounds. The interior spaces' color scheme follows the Lake Balaton's pastel tones with contrasting colors of black. The rooms were designed with practicality as well as comfort in mind, but elegance, delicacy and clean lines were also an important aspect.
